LINING OUT STOCK
Spring 1937

Evergreen Nursery Co.

STURGEON BAY, WIS.

GROWERS OF QUALITY STOCK SINCE 1864

The Lining Out Stock Situation

Last year we thought the lining out stock situation was becoming serious due to many shortages,—and it was. However, the extreme and extensive drought and heat wave has already destroyed a large percentage of available lining out material. Prices are fast advancing, and some items will be impossible to obtain. Many items offered in our previous list we cannot now offer. Prices on nursery stock of every description will steadily advance this year.

TERMS OF SALE

PAYMENT—CASH with order earns 5% discount and free packing. Otherwise packing charged for at actual cost. Regular terms to customers of known credit:
2% 10 days — 1% 30 days — 60 days net.

RATES—25 trees of same variety and size at 100 rate,—250 at 1000 rate.

CLAIMS—We do not entertain claims unless made within six days after receipt of goods.

All orders accepted subject to loss of stock by drought or any other cause beyond our control.

TO OUR EASTERN CUSTOMERS! We can give you some mighty fast freight service! All our eastern freight crosses Lake Michigan on a carferry and is rushed east on through routes. Not only is it very rapid but rates are about 20% lower, as it cuts distance by hundreds of miles, by not going through Chicago.

In the growing of evergreens from seed the importance of seed sources cannot be over emphasized. We spare no effort in securing seed that we know is true to type and collected only from the best of stocks. All native seed is collected by our own men. We have a particular section of sandy loam on which we grow our seedlings. This produces a far better root system than is usually found on seedlings.

Pinus Sylvestris (Scotch Pine)

6-8 inch X	6.00	50.00

THE FEDERAL QUARANTINE on all five needled pines prohibits its shipment into any state except New York and the New England States. Therefore we cannot ship any of the above listed grades of Pinus Strobus into any states except the above. We have never had the Blister Rust here in our section, but the quarantine must be adhered to. HOWEVER,—we have been fortunate in establishing a Ribes Free Zone on which area we are now growing White Pine. By growing these White Pine within this control area and under Federal inspection we are given a permit to ship White Pine anywhere in the United States. Very few of these permits are in existence. In the fall of 1937 we will have seedlings from this area to offer the trade.

Remember, when buying stock from us you are getting material propagated under vigorous climatic, and ideal soil conditions. Stock has to be hardy to thrive up here in northern Wisconsin. Our soil conditions produce a root system that we are just egotistical enough to believe can't be beat anywhere.

Our seventy-three years of successful evergreen growing makes us especially fitted to supply the trade with an excellent grade of material at prices you can't afford to overlook.
